

PEEL 'N' PRESS

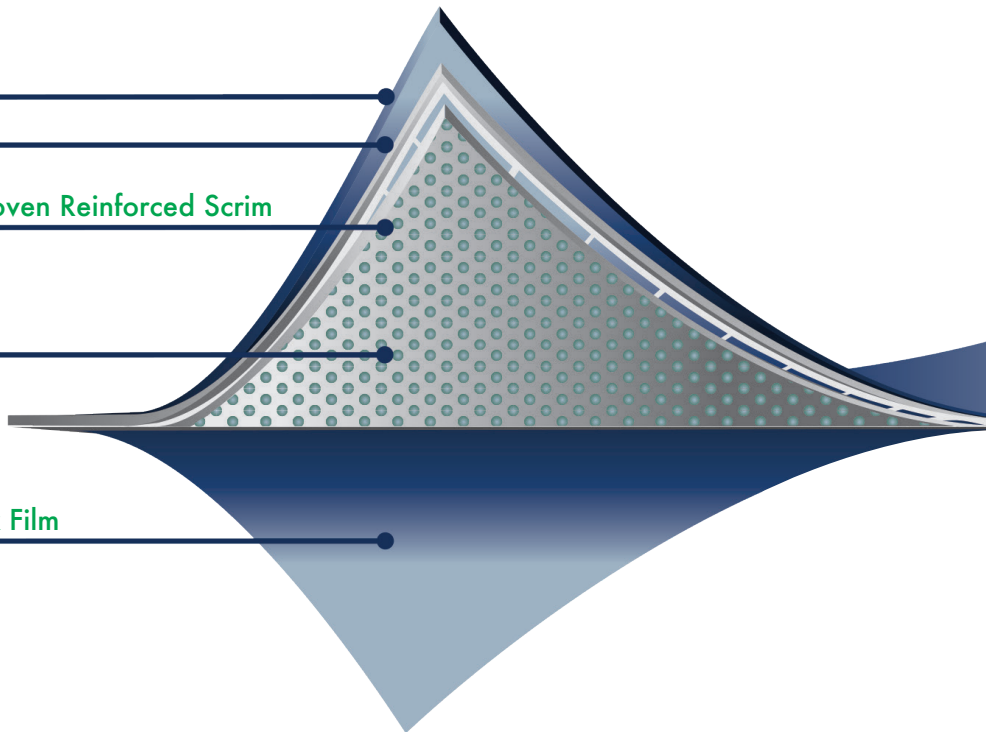

ClimaShield Top Finish

Top Ply Formulation

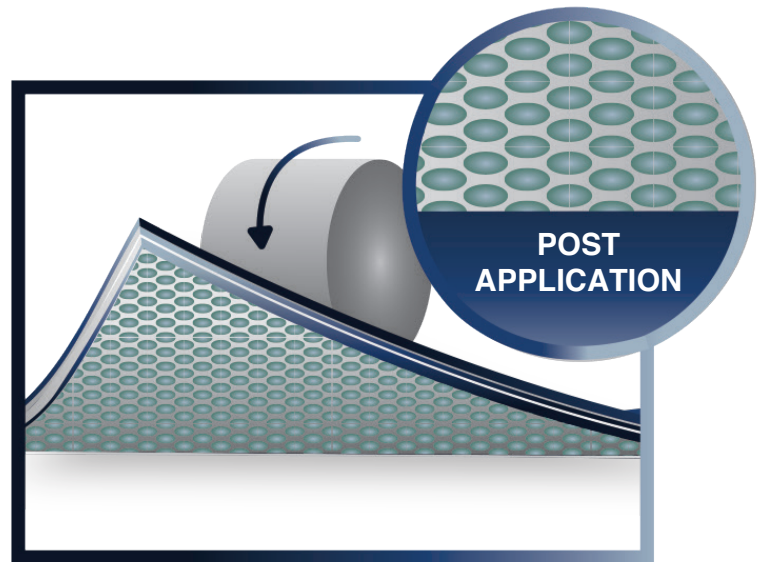

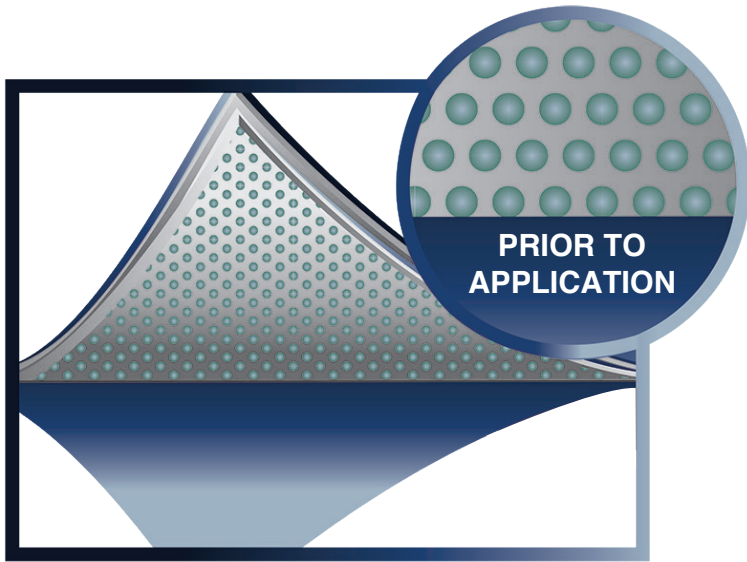

Base Formulation with Woven Reinforced Scrim

Adhesive Layer

Recyclable Release - Back Film

TRUE SEAL Peel 'N' Press is the most innovative adhesive-back roofing system available on the market, offering the greatest ease-of-use and application. **TRUE SEAL** Peel 'N' Press is formulated to adhere with extreme bond strength to almost all construction surfaces at application temperatures as low as -18° Celsius (0.4°F). It is a green solution formulated with zero VOC and solvents, zero adhesive waste, and recyclable backing film. **TRUE SEAL** Peel 'N' Press is a true **game changer** that greatly diminishes the component materials required to install, creating a lesser environmental impact and greater ease-of-use to the installer.

ADHESIVE-BACK PROCESS

Recyclable film backing is peeled from the bottom surface, as the adhesive-back is applied to construction surface.

The formulation creates extreme bonding strength, once the adhesion pressure is applied using a roller.

EASY HANDLING

Material engineered for superior handling, adhesive back simplifies installation.

ENVIRONMENTALLY FRIENDLY

Zero VOC and Zero Solvent formulation, no glue waste, and recyclable film backing.

EXTREME COLD APPLICATION

Application in extreme cold temperatures, as low as -18°Celsius (0.4°F).

WIDE SURFACE APPLICABILITY

Applicable to various substrates as well as construction surfaces such as wood and concrete.
