

PRODUCT DESCRIPTION:

True Seal™ Drip Edge is a pre-bent PVC coated metal to match the profiles illustrated below. The True Seal Drip Edge comes in 4 profiles: 2", 3", 4" and 5".

PACKAGING:

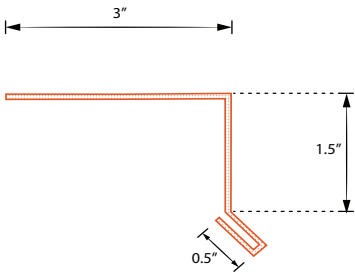

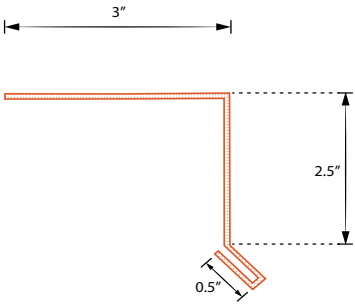

True Seal™ Drip Edge pieces come in 10 foot lengths. They are packaged in groups of 5 for shipping but can be purchased in any number of pieces.

PURPOSE:

True Seal™ Drip Edge is used to provide a metal flashing (closure piece) at the buildings edge. With its PVC coating, True Seal PVC membrane can be welded directly to the True Seal Drip Edge, whether that is True Seal PVC membrane is a field membrane or PVC coverstrip. This welding allows for a complete waterproofing transition from field to roofs edge.

AVAILABLE COLORS:

Standard colors are white, tan, grey and bronze. Custom colors may be available on large orders.
